# abderrahmane abdelioua

## Frontend developer

✉ abderrahmane.abdelioua@gmail.com ☎ +966537514917 📍 Makkah, Saudi Arabia. 🇩🇿 Algerian

📅 31/01/1996 🧑 Single

### PROFESSIONAL SUMMARY

---

An experienced and highly motivated Frontend Developer with a strong passion for learning and building Web Applications that provides a great user experience.

### EXPERIENCE

---

#### Clipper

11/2022 – present

*Social media platform*

- Developed a functioning social media web application using react, express.js, and MongoDB to communicate and interact with other users.
- Developed to let users interact by commenting on each other's posts along with the ability to chat instantly together using a chat service I developed using WebSockets with socket.io library.
- Implemented authentication using JWT to protect timeline API from being viewed by unauthenticated users and signing users in and out using session cookies.
- Improved security of the database by storing only encrypted login data using third-party libraries.

#### Portfolio website

12/2022 – 01/2023

[abderrahmane-abdelioua.netlify.app](https://abderrahmane-abdelioua.netlify.app)

- Designed, Developed, and built a responsive and animated Portfolio website using REACT with multi-platform support to be viewed on any platform and device.
- Developed to connect to Backend APIs to fetch GitHub repositories rest APIs to allow viewers to watch and view all my work seamlessly and effortlessly, with dynamic links to view source code and live hosted demos.
- Built with scalability in mind as all API calls are crafted in a dynamic grid system to allow for new components to be set in an appropriate position.
- improved the performance of the website by using reusable components and React router as well as reducing bundle size by removing all unused packages and dead code.

### PROFESSIONAL EXPERIENCE

---

#### On Job Training Frontend web developer

06/2021 – 09/2021

*Smart Methods*

Makkah, Saudi Arabia

- Developed an interactive website as an interface for controlling a robotic arm Using HTML5, Css3, and JavaScript ES6+.
- Connected the UI with a backend to make requests to the server and handle UI changes depending on the server response.
